## Professional Summary

Results-driven Functional Tester with 2.9 years of experience at Accenture, specializing in end-to-end quality assurance across diverse applications. Skilled in executing mobile testing, regression testing, and smoke testing to ensure seamless functionality and user experience. Adept at analyzing requirements, designing test cases, and identifying defects with precision to support timely project delivery. Strong collaborator with cross-functional teams, bridging QA and development efforts to enhance product reliability. Demonstrated ability to work in fast-paced environments, ensuring compliance with organizational standards and client expectations.

## Skills & Abilities

**Functional Testing**  
**Regression Testing**  
**Test case Design and Documentation**

**Smoke Testing**  
**Mobile Testing**  
**Defect Management**

## Work Experience

**Accenture**

**November 2023 – Present**

*Associate Software Engineer*

*Bengaluru, Karnataka*

- Performed functional testing across multiple projects, ensuring applications met business and technical requirements.
- Executed mobile testing on diverse devices and platforms to validate responsiveness and usability.
- Conducted regression testing to verify stability of existing features after new deployments.
- Performed smoke testing to validate build readiness before deeper test cycles.
- Designed and maintained test cases, ensuring coverage of functional and edge scenarios.
- Collaborated with developers, business analysts, and QA teams to identify, log, and track defects using Jira.
- Validated UI/UX elements for alignment, accessibility, and responsiveness across browsers.

## Education

**Kalasalingam Academy of Research and Education, Madurai**

**June 2019 – May 2023**

*Bachelor of Technology in Electronics & Communication Engineering*

*CGPA: 8.65*

## Projects

**Regeneron Corporate websites** | *Functional Testing*

**Dec 2024 - Present**

- Led functional testing efforts across multiple corporate websites, ensuring alignment with business requirements and technical specifications.
- Conducted comprehensive mobile testing across devices and operating systems to validate responsiveness and usability.
- Performed accessibility testing to ensure compliance with WCAG standards and improve user experience for all audiences.
- Validated webpages for layout consistency, responsiveness, and cross-browser compatibility.
- Delivered structured test reports and defect documentation to stakeholders, supporting timely resolution and smooth release cycles.

**Baush + Lomb** | *Functional Testing* July 2024 - Dec 2024

- Designed and executed test cases to validate application functionality against business requirements.
- Verified all form fields, ensuring accuracy, completeness, and compliance with specifications.
- Performed regression testing to ensure new enhancements did not impact existing features.
- Monitoring and Observability: Monitored system performance and reliability using Prometheus and Grafana dashboards for real-time insights.
