Professional Summary

DevOps Engineer with nearly 3 years of experience in AWS, Jenkins, Docker, Kubernetes, Terraform Ansible, and Shell Scripting across Banking and Healthcare domains. Experienced in CI/CD automation, infrastructure provisioning, container orchestration, monitoring, and production support within enterprise environments. AWS Certified Solutions Architect – Associate with expertise in deployment automation, troubleshooting, and improving application reliability. Immediate Joiner.

Work Experience

EdgeVerve Systems Limited

Feb 2026 – Present

Product Developer (DevOps)

Chennai, TamilNadu

- **CI/CD Pipeline Automation:** Designed and maintained multi-stage Jenkins CI/CD pipelines for microservices, covering build, testing, security scanning (SonarQube/Trivy), TAR packaging, Docker image creation, and deployment. Onboarded FDM and APDM product streams, improving release standardization and deployment reliability.
- **Platform Reliability & Automation:** Automated recovery of disconnected Jenkins worker nodes using Shell scripts and scheduled jobs, reducing manual intervention and improving CI/CD platform availability.
- **Containerization & Orchestration:** Containerized microservices using Podman and deployed them on Kubernetes clusters, ensuring scalable, resilient, and self-healing application workloads.
- **Image Build & Release Management:** Managed layered image build workflows where APDM images consumed FDM base images, validated patch consistency, resolved image-related deployment issues through database verification, and ensured release compatibility across environments.
- **Production Issue Resolution:** Performed root cause analysis (RCA) and resolved critical deployment and Oracle/PostgreSQL database connectivity issues by implementing automated error handling and recovery mechanisms.
- **Infrastructure Management:** Provisioned and managed AWS infrastructure using Terraform, including VPC, EC2, Security Groups, IAM, and Load Balancers, ensuring scalable and version-controlled deployments.
- **Cross-Functional Collaboration:** Collaborated with development, QA, and product teams to troubleshoot deployment failures, resolve configuration mismatches, and ensure smooth release cycles.

Cognizant Technology Solutions

Oct 2023 – Feb 2026

Programmer Analyst (DevOps)

Hyderabad, Telangana

- **CI/CD Pipeline Management:** Built and maintained Jenkins CI/CD pipelines integrated with GitHub for automated build, testing, and deployment across Development, QA, and Production environments.
- **Security Integration:** Implemented DevSecOps practices including automated vulnerability scanning (SonarQube, Trivy) across source code, container images, and IaC pipelines.
- **Containerization & Orchestration:** Containerized applications using Docker and deployed workloads on Kubernetes, ensuring high availability and scalability.
- **AWS Infrastructure as Code:** Provisioned AWS infrastructure including VPC, EC2, S3, ALB, and EKS using Terraform modules, enabling scalable and version-controlled deployments.
- **Monitoring & Observability:** Implemented monitoring using Prometheus, Grafana, and AWS CloudWatch for proactive issue detection and faster incident response.
- **Automation & Production Support:** Developed Shell scripts for operational automation and supported 24x7 production deployments, infrastructure changes, and incident resolution.
- **Cross-Functional Collaboration:** Collaborated with development and QA teams to streamline release processes and improve software delivery.

Skills & Abilities

Cloud: AWS, Azure (Basics)

CI/CD: Jenkins, ArgoCD

Containerisation: Docker, Podman

Orchestration: Kubernetes, EKS, Java, Shelll

Infrastructure as Code: Terraform, Ansible

Monitoring Tools: Prometheus, Grafana, CloudWatch

Databases: Oracle, PostgreSQL

Methodology: Agile/Scrum

Education

Sri Venkateswara University College of Engineering, Tirupati

Aug 2019 – May 2023

Bachelor of Technology in Electronics & Communication Engineering

CGPA: 8.4

Certifications

- AWS Certified Cloud Practitioner – Foundational
- AWS Certified Solutions Architect – Associate
- Certificate by Udemy in DevOps

Other Accomplishments

- Published technical blogs on Medium about AWS and DevOps tools best practices.
- Co-Ordinator for SparkZ, an annual mega techno cultural fest in college.
- Represented a class of 70 as class representative.
