PALLAPU MANEESH KUMAR

DevOps Engineer | AWS | Azure | Terraform | Jenkins | Kubernetes (EKS) | Helm | ArgoCD GitOps

+91-9390330187 | maneeshkumar5161@gmail.com | LinkedIn | GitHub | Bengaluru, India | Notice Period: 30 days

PROFESSIONAL SUMMARY

DevOps Engineer with 3 years of experience in CI/CD automation, infrastructure as code, release engineering and production support on two enterprise platforms: a microservices platform on AWS and a legacy financial/insurance platform on Azure. Hands-on with Terraform, Jenkins, Docker, Amazon EKS, Helm and ArgoCD GitOps. Experienced in high availability, failover testing and cross-tier troubleshooting. Uses AI tools to speed up scripting and documentation, and verifies the output. AWS Certified Cloud Practitioner.

TECHNICAL SKILLS

- **Cloud & IaC:** AWS (EC2, VPC, IAM, S3, RDS, EKS, ALB, Route 53, Secrets Manager, CloudWatch), Azure (VNet, VMs, Blob Storage, Load Balancer), Infrastructure as Code (Terraform, Ansible)
- **Containers & GitOps:** Docker, Kubernetes (K8s), Amazon EKS, Helm, ArgoCD, NGINX Ingress Controller
- **CI/CD & DevSecOps:** CI/CD pipelines (Jenkins), Git, GitHub, Nexus, SonarQube, Trivy, CyberArk
- **Monitoring & Scripting:** Prometheus, Grafana, CloudWatch, New Relic, Shell, Python
- **Reliability:** High availability, failover testing, fault tolerance, incident management, root cause analysis
- **Other:** Linux, DB2, WebSphere, IBM HTTP Server, SQL, MySQL, ServiceNow

PROFESSIONAL EXPERIENCE

Associate - DevOps Engineer, Cognizant Technology Solutions | Oct 2023 – Present | Bengaluru, India

Project 1: Microservices Platform (AWS)

- Deployed 6 microservices on Amazon EKS across 4 environments (dev, test, UAT, pre-prod) using Helm charts I authored (Deployments, Services, ConfigMaps, Secrets, NGINX Ingress, HPA, rolling updates, probes, resource limits), released through an ArgoCD GitOps flow with Jenkins.
- Built and maintained 20+ Jenkins CI/CD pipelines for build, deployment, validation and rollback using Docker-based build environments, with SonarQube, Trivy and Nexus for quality gates, image scanning and artifact traceability.
- Worked with Terraform to provision AWS infrastructure (reusable modules, workspaces, S3 remote state with DynamoDB locking) for consistent, repeatable environments.
- Secured credentials with AWS Secrets Manager; monitored clusters with Prometheus, Grafana and CloudWatch.
- Resolved production incidents: CrashLoopBackOff and 503 errors caused by probe misconfiguration and service-name mismatches, "too many pods" scheduling errors, and network breaks.
- Managed production releases (about 2 per month) with deployment validation, log analysis and rollback.

Project 2: Enterprise Financial & Insurance Platform (Azure)

- Built a Shell automation to sync 62 DB2 tables across test regions (structure validation, region-specific export/import), cutting a ~2.5-hour manual process to under 5 minutes (~97%).
- Deployed on Azure infrastructure provisioned with Terraform, and automated code compilation and DB2 bind through Jenkins pipelines.
- Implemented a highly available 3-tier architecture (design led by my lead) to end batch-time outages on a platform serving millions of users: configured DB2 client connectivity and the IBM HTTP Server reverse proxy, and validated failover end to end (DB2 HADR, clustered middleware, WebSphere active-active) behind an Azure Load Balancer. No batch-related outages since go-live.
- Contributed to migrating 50,000+ modules from PVCS to GitHub (10 repositories): adapted scripts to migrate version history, verified source-to-destination integrity with Python (file counts and checksums), helped define branching and merging strategy, documented Git workflows and trained developers. Helped shorten the release cycle by roughly a week.
- Built Python health dashboards (JSON status data to HTML pages) and resolved cross-tier production issues, including a network break between the load balancer and web tier and a configuration-file permission failure that broke a production compile.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)

EDUCATION

B.Tech, Electronics & Communication Engineering, Kalasalingam Academy of Research and Education | 2019–2023 | CGPA: 8.3 / 10
