

PALLAPU MANEESH KUMAR

DevOps Engineer

+91-9390330187 — maneeshkumar5161@gmail.com — LinkedIn — GitHub

Professional Summary

DevOps Engineer with 3 years of experience in **CI/CD automation, release engineering, cloud-native platforms and infrastructure automation**. Hands-on experience with **Jenkins, GitHub, Terraform, Docker, Kubernetes, Amazon EKS, Helm and AWS services**. Skilled in Kubernetes deployments, service discovery, ingress routing, infrastructure automation and troubleshooting application, networking and database connectivity issues.

Technical Skills

Cloud	AWS (EKS, EC2, IAM, VPC, RDS, Route53, S3, Load Balancer), Azure
CI/CD & GitOps	Jenkins, ArgoCD, GitHub, Git, SonarQube, Nexus Repository Manager
Containers & Orchestration	Docker, Kubernetes, Amazon EKS, Helm, NGINX Ingress Controller
Infrastructure as Code	Terraform, Ansible
Monitoring	New Relic, Prometheus, Grafana
Testing	Pytest, Unit Testing
Scripting	Shell Scripting, Python
Operating Systems	Linux, Windows
Databases	MySQL, SQL, DB2

Professional Experience

Cognizant Technology Solutions Oct 2023 – Present *DevOps Engineer* Bengaluru, India

ENTERPRISE PLATFORM MODERNIZATION

- Designed and maintained **20+ Jenkins CI/CD pipelines**, automating build, deployment, validation, rollback and release management across **Dev, UAT, Pre-Production and Production** environments.
- Integrated **SonarQube, Nexus Repository Manager** and Git-based workflows into enterprise CI/CD processes, improving code quality and artifact management.
- Automated deployment and operational activities using **Shell Scripting**, reducing manual effort and improving deployment consistency.
- Led migration of **50,000+ application modules** from a legacy version-control platform to **GitHub**, enabling standardized source control and collaboration.
- Reduced critical deployment activities from **3 hours to under 5 minutes** through CI/CD automation, scripting and process standardization.
- Utilized **Docker-based build environments** within Jenkins CI/CD pipelines for application compilation, artifact generation and dependency isolation, ensuring consistent and reproducible builds across environments.
- Supported production releases, troubleshooting, rollback activities and application monitoring using **New Relic**, ensuring deployment reliability and platform stability.
- Contributed to **Terraform** adoption and infrastructure modernization initiatives, supporting migration from legacy **2-tier** architecture to scalable **3-tier** cloud-based solutions.

CLOUD NATIVE APPLICATION PLATFORM & GITOPS IMPLEMENTATION

- Built an end-to-end **GitOps platform** using **Jenkins, Helm, ArgoCD, Amazon EKS and Amazon RDS**, automating deployments for **3 microservices**.
- Developed **Jenkins CI pipelines** integrating **Pytest, SonarQube, Docker Build and Docker Hub publishing**, enabling automated build validation and image delivery.
- Implemented **GitOps-based Continuous Delivery** by updating **Helm image tags** through Jenkins and synchronizing deployments using **ArgoCD**.
- Deployed containerized microservices on **Amazon EKS** using **Deployments, Services, ConfigMaps, Secrets and NGINX Ingress Controller**, implementing service discovery and ingress-based routing.
- Packaged applications using reusable **Helm Charts** and centralized **values.yaml** configuration, simplifying release management and deployments.
- Troubleshoot **CrashLoopBackOff, CreateContainerConfigError, RDS connectivity, Security Groups, Ingress routing, ConfigMaps, Secrets** and inter-service communication issues.

Education

B.Tech, Electronics & Communication Engineering – Kalasalingam Academy of Research and Education — CGPA: 8.3

Certifications

AWS Certified Cloud Practitioner — DevOps Certification (Udemy) — Cloud Computing Certification (Udemy)
