

Pallapu Maneesh Kumar

Infrastructure & DevOps Engineer

Professional Summary

Nearly 3 years of enterprise DevOps experience in CI/CD, automation, Linux, DB2, WebSphere, GitHub migration, monitoring, Azure migration support and AWS/Kubernetes projects.

Professional Experience

- Designed and maintained Jenkins CI/CD pipelines for enterprise COBOL/CICS applications across multiple environments.
- Led migration of approximately 50,000 application modules to GitHub across multiple repositories and standardized developer workflows.
- Prepared GitHub documentation and delivered KT sessions on Git workflows and pull requests.
- Developed automation for migration of 62 DB2 setup tables, reducing execution time from about 3 hours to 5 minutes.
- Performed DB2 backup, restore and release support activities.
- Supported migration from IBM AIX on-premises to Linux-based Microsoft Azure environments.
- Provisioned new application regions containing DB2, CICS, COBOL and IBM WebSphere for multiple enterprise products.
- Collaborated on automation for DB2, CICS and environment provisioning.
- Used New Relic to analyze CPU and memory utilization of long-running jobs and optimize parallel execution.
- Created Shell scripts with cron scheduling to monitor resources and send automated email alerts.
- Supported Docker adoption, Terraform activities and production deployment automation.

Cloud-Native Project

Built AWS microservices platform using Docker, Kubernetes, Helm, Jenkins, Terraform, Prometheus and Grafana.
